PREFATORY NOTE

THIS eighty-first yearly issue of THE ENGLISH CATALOGUE OF BOOKS comprises the titles (under authors, and subjects or titles) of works published during 1917, and also of some received too late for inclusion in the eightieth issue.

The main entry for each book begins with the author's surname (if known) in **heavy type.** As an index to these " Author " records, entries are also made under the titles, commencing with their most important words (which usually indicate the *subjects* with which the books deal), or with the first words; the name or word under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the full information about a book may be found. Main entries and index entries are in one alphabet.

Writers with compound names are entered under the first part of the name, *e.g.* :—

Baring-Gould (Sabine)

and accordingly must be looked for in that order. References are also made, however, from the last part of the name.

It should be noted that Official and Parliamentary Publications mentioned in this volume, with the exception of the Hydrographic Publications of the Admiralty, can now be purchased directly from H.M. Stationery Office. Attention is also drawn to the form of date adopted in the latter months of this year ('17). This has resulted in a want of uniformity in the completed volume, but was introduced to define more clearly that the number after the month refers to the year of publication.

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland, followed by those of the principal publishers in the United States and Canada, will be found at the end of the volume. The telegraphic and cable addresses and telephone numbers have been added when known.

Following the Preface is an analysis of the books of the year 1917, showing in detail the number of works in each class of literature, and giving the proportions of new books, translations, pamphlets, and new editions.

Hearty thanks are due to many publishers, secretaries, librarians, authors and bibliographers who have assisted in making this book more correct and comprehensive than it would have been otherwise.

The Editor will be glad to have particulars (author, title, size, price, publisher, and month of publication) of any work which may have been omitted. Information regarding each book should be given on a separate slip of paper or postcard. It should be addressed to *The Editor of* THE ENGLISH CATALOGUE OF BOOKS, " Publishers' Circular " Office, 19, Adam Street, Strand, London, W.C. 2.

THE EDITOR.

1918.

ANALYSIS OF BOOKS

PUBLISHED DURING 1917 IN THE UNITED KINGDOM

THE PUBLISHERS' CIRCULAR AND BOOKSELLERS' RECORD records a total of 8,131 books as having been published during the year 1917, a decrease of 1,018 volumes compared with the output of 1916. The falling off has been distributed unevenly over all classes of literature with the exceptions of Philology, Medicine, Agriculture, Domestic and Business, each showing a small increase, and History showing a comparatively large increase of 147 items. These classes represent subjects brought into prominence by the continuance of the European War, as, for instance, the necessity of word and phrase books for the use of soldiers and others, the demand on medical science, the problem of production, the readjustment of business and domestic life, and the record, historical and general rather than technical, of the War. The quality of the 1917 output has maintained a good level and, combined with so comparatively small a decrease in production in face of unparalleled difficulties of labour and materials, is a great tribute to the vitality and enterprise of British authors and publishers.

It should be noted that in the following classes "Education" includes only books about educational theory and practice, and not text books on special subjects, which are classed elsewhere; that under "Music" only works about music are recorded; and that books dealing generally with the European War are classed under "History," while those of a technical nature are placed under the heading "Military and Naval." It would be possible to swell the total to a much greater figure by counting numerous leaflets (Government and other), ephemeral pamphlets, the publications of borough councils and other local government bodies, and musical texts. While it is obvious that our total could be increased greatly by the inclusion of all this literary protozoa, the figures would not represent so accurately the book publishing activity of the United Kingdom.

The following totals of the last ten years are of considerable interest:—

Year.	New books.	New editions.	Total.
1908	7,512	2,309	9,821
1909	8,446	2,279	10,725
1910	8,468	2,336	10,804
1911	8,530	2,384	10,914
1912	9,197	2,870	12,067
1913	9,541	2,838	12,379
1914	8,863	2,674	11,537
1915	8,499	2,166	10,665
1916	7,537	1,612	9,149
1917	6,606	1,525	8,131

In these tables each publication is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume; so that, for example, the series of "Statutory Rules and Orders" issued by the Government, and amounting to several hundred in the year, are counted as one item on the appearance of the annual collected volume. The same rule applies to volumes of magazines, &c. Further detailed information regarding the year's publishing is supplied by the appended analytical tables.

DIRECTORY OF PUBLISHERS

Publishers are invited to send us their Telegraphic Addresses and Telephone Numbers.
Those sent will be found below between square brackets [ ], and separated from each other by a semicolon (;)
The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional part of their business.
